

Osaid Ziad Khader Alhawamdeh

AI Engineer | B.Sc. Artificial Intelligence & Data Science

Professional Bio

Osaid Ziad Khader Alhawamdeh is an AI Engineer and Artificial Intelligence & Data Science graduate from Tafila Technical University. His work focuses on applied AI systems across machine learning, deep learning, retrieval-augmented generation, cybersecurity analytics, and human-in-the-loop workflows.

He built SentinelAI, an intelligent violence-detection system combining EfficientNetB0 and Bi-LSTM models to analyze spatial and temporal video patterns, achieving 97%+ accuracy and a 0.97 F1-score. He also developed SOC Copilot, his graduation project: a RAG-powered assistant designed to support Security Operations Center analysts with alert investigation, log analysis, and threat-context retrieval. His broader portfolio includes PharmaGuard AI, a pharmacist-centered RAG prototype with safety-aware, review-first workflows.

Through AI.SPIRE: Applied AI and ML Systems, Osaid has strengthened his experience in Applied NLP, machine learning, RAG systems, APIs, Docker, Git/GitHub, and AI system documentation. Alongside his technical work, he has delivered 14+ AI and digital-skills workshops and earned recognition through hackathon awards, national representation, and youth technology initiatives.
